Specifications

All models	
Supply Voltage	230 - 240 V a.c. 50Hz
IP Rating	IP65
Net. Weight	2.6 Kg

Fix to wall directly

Fix to wall via lugs
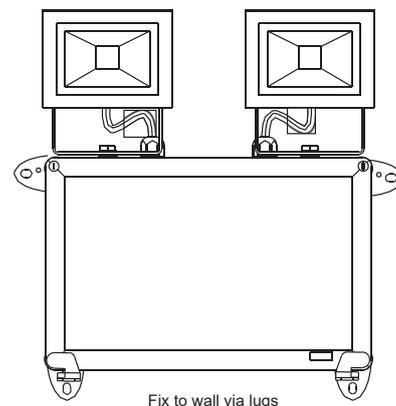

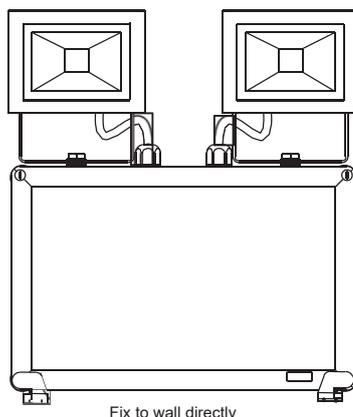

The Twin LED Spotlight can be fixed to the wall either directly or using the lugs provided.
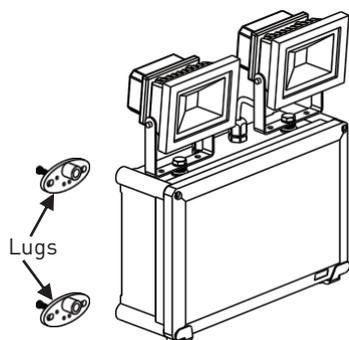

Lugs

1. Fix the box to the wall either directly through the 4 channels in the box or using the lugs. Use 8 to 12 gauge screws (not supplied).
2. Open the box and drill a Ø 20mm hole in the desired cable entry location, taking care to avoid damaging internal components.
3. Install the supplied cable gland in the Ø20mm hole. This is necessary to maintain the IP rating.
4. Fit the power cable through the gland and terminate into the terminal block. Cable gland is compatible with circular cable 8-10 mm in diameter. e.g. 3-core heavy duty (H07VV-F) $1.0mm^2$ or $1.50 mm^2$ flexible cord.
5. Close the Twin spotlight cover and lock into position.

Note: For DALI models, connect the DALI cable to the DALI terminals. If the DALI cable is separate from the power cable, an additional cable gland will be required.

Test Switch

The test switch on this product is a magnetic type so that the weatherproof seal does not have to be opened. To perform a manual test, hold a magnet against the product surface near the ˝**Magnetic Test Switch**˝ label.

Warranty

Legrand guarantees this lighting unit for a period of 5 years from date of despatch, solely against failure arising from faulty materials or workmanship, and provided that the unit has been stored, shipped, installed, used and maintained in accordance with the manufacturers instructions and relevant standards. Consult Legrand Conditions of Sale for details on warranty liability. If this lighting unit is faulty, return the unit freight pre-paid to your point of purchase, or contact Legrand.
