D817SLIMTP	9321001426240	560 x 440 x 285mm	12.9kg

The 24/7 Digital Timer is designed to turn ON and OFF electrical devices such as lamps, seasonal lighting and heaters for a preset period of time through easy and accurate programming functions.

- Slim design: Fit two timers side by side on one powerpoint.
- Program up to 16 ON and OFF switching times per day.
- 24/7 settings: Set your timer on different hours and/or days of the week.
- To-the-minute programming accuracy.
- Home-Safe mode: Randomly delays the start and finish times of your programmed settings by 4 – 32 minutes. This helps provide added security to your home by creating an unpredictable pattern for lighting when you are away.
- Countdown mode: Use with festive lights so they turn OFF after you go to bed.
- Easy summer time setting: Change the clock to daylight savings time with a push of one button.
- Internal rechargeable battery back up so you won't lose your settings in a power failure.
- Easy programming: Detailed instructions provided.
