

COMPACT 24-HOUR PLUG-IN TIMERS

Cats D810/1 & D819

Easy to use multi-event or single event timers

Key Benefits at-a-glance

- ✓ Simple, economical security device
- ✓ Simple, economical convenience device
- ✓ Portable

D810/1

FEATURE

BENEFIT

(Both models)

- 24-hour plug-in timers

Security and convenience for repetitive timed switching operations. Ideal for security (switch lights, radio, TV etc. on and off even when you're not home). Convenience of switching on air conditioning etc. before you get home. (Note: it is not recommended to switch heaters on while absent due to the risk of fire). Fully portable - just take it to another powerpoint!

- Override switch

Allows the powerpoint to be operated as a normal switch to turn appliances on and off independently of the timer settings.

- Economical design

Provides a useful security deterrent or convenience for a small outlay.

(Cat D810/1 only)

- Pins for up to 6 on-off cycles per day

Allows multiple cycles for real "somebody's home" appearance.

(Cat D819 only)

- Easy-set operation, just two arrows to set

Simplest setting available, less complicated than multi-pin or digital types.
